Custom Software Development

08

We are a client-centric, Kenyan ICT firm that develops ICT solutions that automate business processes in every sector of the economy.
We listen to the client's needs and come up with simple customized software that meets their specific needs. These software has to promote efficiency, sustainable innovation, and best practice in accordance to the client's line of business.
We develop rich mobile financial solutions that allow our clients to ride on the existing telecommunication infrastructure with either mobile device-based, web based or PC applications.

We develop smart solutions for smart people.

09

ICT Consultancy

At Tangazoletu Limited, we believe that it's time organizations see technology as an enabler. We are driven by the mantra, 'If it's thinkable, then it's doable' and believe that once you are guided by that mantra, then you can innovate, always. With this in mind, we listen to our clients, note down their needs and employ best practices to invent the next practices that will meet and exceed their current needs.

Our expert consultancy covers the full lifecycle from requirements analysis, design, coding, piloting & testing, deployment and 24x7 support and maintenance of the said systems.
We bring onboard our expertise and ensure that we and the systems we develop for you add maximum value to your business
